

7 SIGNAL
WIRELESS BUSINESSGUARD

7SIGNAL SAPPHIRE PRESENTS WIRELESS QUALITY ADVANCEMENT

7signal is the leading provider of **Wireless Quality Advancement (WQA)** solutions. For WLAN managers and end-users **7signal Sapphire** is the world's first complete end-to-end WLAN quality solution providing continuous monitoring and troubleshooting of any WLAN network.

Using **patented multi-sectored, high performance monitoring** stations within the monitored networks, 7signal Sapphire is able to provide invaluable information on the **condition and performance** of the network from an end-user perspective. The solution ensures the availability of the network and prevents downtime.

Each **Eye** unit monitors the radio environment and any neighbouring networks, calculating quality metrics for end-users and performs end-to-end application tests. This way, troubleshooting, problem location and **correction can start before the end-user even experiences any problems.**

Today, WLAN networks suffer from a "best effort" service level and reactive network management, relying heavily on end-user fault reports. 7signal Sapphire eliminates and solves this problem by providing a performance and **Service Level Agreement (SLA) platform for WLANs.**

7signal Sapphire

Business cost savings

- Maximize existing WLAN performance without buying new infrastructure
- Minimize number of user complaints
- Decrease OPEX through problem prevention and diminished downtime
- Enhance ROI for WLAN application

Easier operation and management

- Centralized 24/7 network monitoring and reporting alarms
- Measure WLAN performance from end-user's perspective
- Vendor independent solution

New confidence level in WLAN

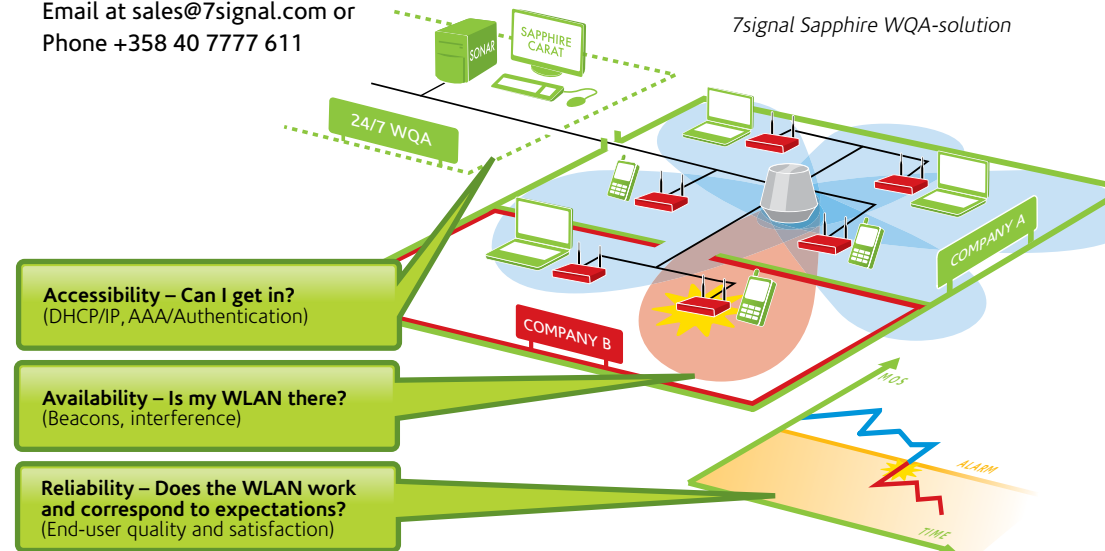

- Enhance WLAN service quality with SLAs for business critical networks

Features & BENEFITS

YOU CAN ONLY IMPROVE THINGS THAT YOU CAN MEASURE!

Find out what is really causing trouble in your WLAN. Optimize your network and bring your WLAN to a business-critical level where it meets the needs of your organization and saves you significant costs.
